OBJECTIVE

Aspiring Software Engineer with backend development experience as a Backend Software Engineering Intern at Upay (UCB Fintech Company Ltd.), primarily working with Python, Django, and Django REST Framework. Additionally proficient in Java and Spring Boot with a passion for building secure, scalable and high-performance software solutions.

EXPERIENCE

Software Engineering Intern (Backend)

June 2026 – Present

উপায় (UCB Fintech Company Ltd.) – Technology Division

- Develop and maintain backend applications and RESTful APIs using Python, Django and Django REST Framework (DRF).
- Collaborate with the backend engineering team on feature development, enhancements and production code maintenance.
- Work with real-world production codebases to implement new features, improve existing functionality and ensure code quality.
- Implement authentication, authorization, Redis caching, Celery background tasks and database optimization to build secure and scalable backend systems.
- Debug, troubleshoot and resolve backend application issues while supporting testing and performance improvements.
- Utilize Git, GitHub, GitLab and Docker for version control, collaborative software development and containerized development environments.

PROJECTS

Role Based Micro-Finance Management System Using Django

6 May – 10 May 2026

- Developed a role-based Microfinance Management System using Python and Django, supporting Admin, Field Officer and Borrower roles.
- Built secure modules for borrower, loan, product, group, and member management with authentication, authorization and CRUD operations.
- Designed the backend using Django ORM and SQLite to ensure efficient database management and application performance.

Micro finance Management system

May 2025 - Aug 2025

- Developed a role-based microfinance management system using Java Spring Boot.
- Built secure RESTful APIs for borrower registration, loan applications, approvals, repayments and digital payments.
- Implemented role-based dashboards for Borrowers, Field Officers and Backend Officers.

- Applied OOP principles, authentication, database management and full-stack development to build a secure and scalable application.

Student Management System

Mar 2026 – April 2026

- Developed a role-based Student Management System using Java Spring Boot.
- Built secure RESTful APIs for student registration, course enrollment, assignment management, grade management, fee payments and academic reporting.
- Implemented role-based dashboards for Administrators, Teachers and Students.
- Applied OOP principles, authentication, database management and full-stack development to build a secure and scalable application.

TECHNICAL SKILLS

Programming Languages

C/C++, Java, Python

Backend Development

Django, Django REST Framework (DRF), Spring Boot, RESTful API Development, Authentication & Authorization, Redis, Celery, Django ORM

Web Development & Database

HTML, CSS, JavaScript, MySQL, PostgreSQL

Tools & Platforms:

Git, GitHub, GitLab, Postman, Docker, IntelliJ IDEA, Visual Studio Code, Jupyter Notebook, ProjectLibre, ArgoUML

Artificial Intelligence & Machine Learning:

Supervised & Unsupervised Learning, Neural Networks, Deep Learning, Transfer Learning, NLP, Orthogonal Tensor Ring(OTR), Data Analysis, Big data, Data Preprocessing, Feature Engineering, Model Development etc.

EDUCATION

Bachelor of Computer Science and Engineering

University Of Liberal Arts Bangladesh

CGPA: 3.72/4.00 (Up to 11th Semester)

Oct 2022-Present

Higher Secondary Certificate (HSC)

Govt. Shah Sultan College, Bogura

GPA: 5.00/5.00

2020

Secondary School Certificate (SSC)

Gabtal Pilot High School

GPA: 5.00/5.00

2018
